

For Our New Members Filling Worker's Compensation

Your worker's compensation insurance through your employer will normally cover most of your chiropractic costs due to your on-the-job injury with no out-of-pocket expense on your part. It must be understood that you are responsible for your account in the event that the insurance company denies payment for any reason.

If there is no payment from the insurance company within 90 days, payment must be made in full for any outstanding balance, and payment will be made for each service as they are rendered. If care is terminated for any reason, payment must be received in full for outstanding balances.

The above financial policy has been explained to me and I understand it fully. I understand that I am fully responsible for my account in the event that the insurance company denies payment for any reason.

I have read and understand this policy.
